Georgia Tech

Resources @ IRP

The Office of Institutional Research and Planning provides a number of resources to the general public and specific campus stakeholders, including the annual campus fact book, infographics, and external report analysis.

Georgia Tech Fact Book

IRP produces the Georgia Tech Fact Book as an institute-level product aligned with standard higher-education practices. This essential resource provides comprehensive data on institutional performance, including admissions, enrollment, finance, and faculty.

Institute Resources

IRP serves as a consultative resource by providing the Common Data Set, rankings analysis, and flagship institutional reports to support strategic planning. We hold exclusive access to JobsEQ program market data to assist with market analysis. our team helps campus units interpret data, understand trends, and answer strategic questions.

Georgia Resources

IRP highlights state-provided tools and the USG-sponsored Steppingblocks platform to offer insights into graduate outcomes and career paths. We support the campus in accessing and interpreting these Georgia resources, including USG dashboards and state report cards.

Federal Resources

IRP highlights publicly available national data resources and directs stakeholders to tools such as the College Scorecard and NSF Data Explorer. These resources provide valuable comparative data on student outcomes, institutional characteristics, and research funding.

Infographics

IRP creates visually compelling, data-driven visuals such as the yearly Quick Facts and Completions series to make complex institutional data more accessible to a wider audience. These infographics distill student demographics and institutional research data into clear formats.
